

Welcome to the sportier side.

You're used to making a statement. Now you can drive one - with the dynamic, motorsport-inspired N Line trim. In addition to the performance styling, several powertrains also come with optimised Electronically Controlled Suspension (ECS) settings for sportier driving dynamics.

The confidence of professional details.

Upgraded with a wide range of motorsport-inspired design features, the all-new TUCSON N Line exudes exhilarating performance flair. The aggressively reimagined front end is crowned by a unique N Line version of the parametric grille and wider air intakes, with a black bezel framing the LED headlamps. Under the grille, the rectangular-shaped bumper and a refined air intake have been stretched visually to the outside – and is taller and bigger than on the standard TUCSON for a more muscular look.

Precise. Sophisticated. Sharp.

To emphasise the car's sporty appearance at the rear, the all-new TUCSON N Line is outfitted with an aerodynamic spoiler that is longer than that of the standard model and garnished with fins. Aggressive twin tip muffler exhausts further underline the fact the model's designers took many cues from the world of high-performance cars. The profile is characterised by a sharp-looking side moulding in body colour, which creates more dynamic proportions and lines for a slimmer look. The body colour claddings and bumper put a sleek accent on this sporty statement. The glossy black frame around the side windows flows into the dynamic angle of the C-pillar, generating a race track-inspired feeling of forward motion.

Dynamic design enhancements.

For the TUCSON N Line, the designers emphasized the stable, wide stance by pushing the design elements like the bumpers and grille farther out to the side for a more horizontal, muscular look. The wider, more trapezoidal N Line grille design, features the N Line badge and black bezels framing the headlamps.

The wider rectangular N Line bumper with enlarged air intake refinements are some of the highlights in the front.

The N Line grille's parametric jewel patterns have been elaborated with sporty edges to create additional reflections.

The rectangular rear bumper harmonizes with the sporty twin tip exhausts and a bright silver skid plate, which is accentuated by a red reflector band.

Stronger and sportier 19-inch alloy wheels continue the Sensuous Sportiness theme, with parametric patterns emphasising their geometric structure.

Upgrade your comfort zone.

Welcome to a whole new level of precision. Sit down in the all-new TUCSON N Line's upgraded cockpit and you'll feel its sleek, professional atmosphere instantly. The sporty N Line seats are finished in luxurious mix of perforated black suede and leather. They feature the N logo and red contrast stitching, which can also be found on the door trim and armrest. Other N design elements are to be found on the leather gearshift knob or shift-by-wire console cover, depending on the chosen transmission. Meanwhile, a black headliner gives the interior an extra sporty touch. Further N Line enhancements include metal pedals, a foot rest and door steps.

Finished in fine leather and featuring red contrast stitching and sporty metallic spokes, the N Line steering wheel proudly displays the N logo.

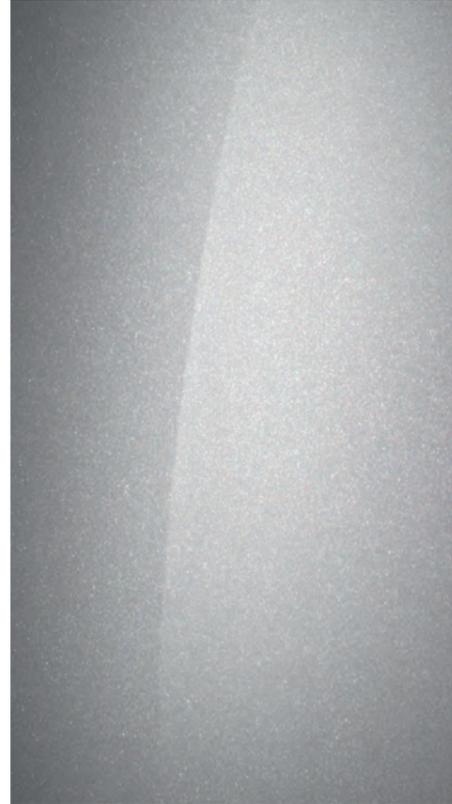

The N logo is also displayed on the elegant shift-by-wire covering in the centre console.

Express yourself.

Make the all-new TUCSON N Line yours with a choice of seven exterior colours, including Shadow Gray, which is exclusive for N Line. For even more personalisation, you can select an optional two-tone roof in Phantom Black Pearl with five colour trims.
